

# If you are being treated with Novolizer®

## Novolizer® – easy to use correctly

Push down the dispenser button to prepare a dose. When the indicator turns green, the dose is in place and the inhaler is ready to use. After a correct inhalation the display changes from green to red. If the colour does not change, inhale again.

1. Take off the cap

2. Press the dispenser button

3. Inhale

## Novolizer® – you know when you've done it right

**Double click**  
Confirms the dose is ready

**Green**  
The inhaler is ready to use

**Click**  
Confirms correct inhalation

**Red**  
Confirms correct inhalation

**Taste**  
Confirms correct inhalation

## Novolizer® – a clear dose counter

Novolizer® has a dose counter that shows every tenth dose. When the dose counter shows 0, it's time to change the cassette.

**Novolizer®**  
The inhaler that makes a difference

## Refilling the inhaler with a new cassette

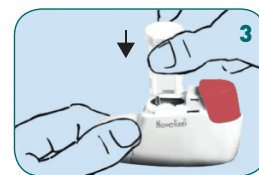

1. Lightly press together the ribbed surface on the sides of the cover, slide the cover forward and lift it off.

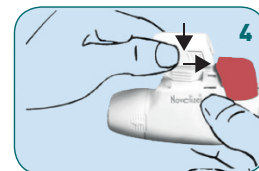

2. Remove the protective aluminium foil from the cassette holder and take out the cassette.

3. Place the cassette in the inhaler with the dose counter facing forward.

4. Replace the cover on its side tracks from above and push down until it clicks.

## Novolizer® – the inhaler that makes a difference

Novolizer® is used in the treatment of asthma and COPD (chronic obstructive pulmonary disease).

Novolizer® comes in a series:

**Novopulmon® Novolizer®** (budesonide)  
Inhalation steroid

200 µg, 200 doses • 400 µg, 200 doses

**Formatris® Novolizer®** (formoterol)  
Long-acting bronchodilators

6 µg, 60 doses • 12 µg, 60 doses

**Ventilastin® Novolizer®** (salbutamol)  
Short-acting bronchodilators

100 µg, 200 doses

Novolizer® lasts for up to 2000 inhalations or for one year. This means you can refill the inhaler yourself, which reduces the cost and the environmental impact.

## My treatment plan

### Novopulmon® Novolizer® – inhalation steroid

Strength:  200 µg       400 µg

Number of inhalations/day: ..... Start date: .....

### Ventilastin® Novolizer® – short-acting bronchodilators

Strength:  100 µg

Number of inhalations/day: ..... Start date: .....

### Formatris® Novolizer® – long-acting bronchodilators

Strength:  6 µg       12 µg

Number of inhalations/day: ..... Start date: .....
